

# GPL 5000 ODORIZER

High-flow stations at low pressure

1 to 400 PSI

0 to 512 MMSCFD (@0.5 lbs./MMSCFH)

Natural Gas, Propane (LP), Biomethane (RNG), & Biogas  
Odorization

## Product Description

The GPL 5000 is an advanced odorizer ideal for natural gas and propane odorization, particularly in high-flow stations at low pressures. The odorizer utilizes proprietary technology to deliver extraordinary odorant injection accuracy in both high and low flow. The 5000 requires minimal maintenance and offers the highest quality and high value.

No smell operation. A closed-loop system means no gas or odorant releases into the air.

Extraordinary accuracy due to a unique approach involving its flow meter and dual path solenoids.

No Emissions. Environmentally safe. The system does not emit gas or odorant to the atmosphere.

Simple operation (even for those unfamiliar with odorization) and low maintenance (only 2 moving parts).

Reliable, advanced—yet simple, inexpensive to operate, and planet-friendly.

Ask about 1-Source Odorization - an all-inclusive solution including equipment and service, from start to finish for new projects.

## What they're saying ...

*The GPL odorization units are reliable and trouble-free. The odorizers have clean systems—meaning no smell.*
